PROFILE

I have a BS on Environmental Engineering with hands-on experience in both food manufacturing and medical device industries. My work has centered on ensuring operational compliance, enhancing environmental sustainability, and upholding regulatory requirements in highly controlled industrial settings.

EXPERIENCE

Environmental Specialist

Caribbean Refrescos, Inc | Cidra, PR

May 2024 - Present

Ensured compliance with environmental regulations (local, federal, company) through timely submission of permits and reports. Managed sampling, waste handling, and environmental documentation for water, air, and hazardous materials. Supported successful ISO 14001 and KORE audits and drove continuous improvement in environmental programs. Optimized waste management processes, reducing costs and risks. Provided technical training to staff, strengthening safety and sustainability culture.

Environmental Engineer

Baxter International Inc. | Aibonito, PR

April 2022 – May 2024

Lead the coordination, managing, education, planning and monitoring of the Facility's Environmental program. Develop and update Environmental procedures, reports and plans. Manage and ensure proper disposal of non-hazardous, regulated and special waste included in manifesting, transportation and, record keeping. Manage programs for the identification of opportunities and waste minimization and pollution prevention initiatives, to achieve objectives and goals included in the facility environmental program.
