

JAVIER RIVERA DELGADO

MAINTENANCE TECHNICIAN

📞 787-909-4443 | ✉️ javierboricua91@gmail.com | 📍 Urb. April Gardens calle 3 E-11 Las Piedras, PR 00771

SUMMARY

Industrial maintenance professional with dual experience as a technician and supervisor. Capable of performing complex repairs, diagnosing faults, coordinating teams, managing inventory, and documenting operational activities. Experienced in high-volume plants, focused on safety, efficiency, and continuous improvement.

PROFESSIONAL EXPERIENCE

Maintenance Technician, Optima

2024 - 2025

Skilled mechanical and assembly technician with experience in industrial manufacturing processes, specializing in engine components and precision equipment. Strong ability to interpret technical drawings, follow standardized procedures, and operate specialized tools. International travel to learn the complete engine assembly process. Engine assembly and high-precision mechanical component installation.

Maintenance Technician, Polaris

2020 - 2024

Installed equipment to meet safety and performance standards. Performed preventive and corrective maintenance to reduce downtime and keep machinery running efficiently. Diagnosed mechanical failures, restoring equipment quickly to support production. Supported daily operations by resolving equipment issues and ensuring continuous workflow. Followed all safety procedures and maintained accurate maintenance documentation.

Maintenance Technician, Kerry Ingredients

2019 - 2020

Performed full-scope maintenance and repairs on broken or impaired equipment to restore safe and reliable operation. Kept detailed, accurate records of equipment performance, repairs, and maintenance activities to support compliance and planning. Conducted training for operators and team members on proper equipment use, safety procedures, and basic troubleshooting. Assisted the supervisor with special tasks and technical projects, providing hands-on support and expertise. Followed the plant's preventive maintenance program to reduce downtime, improve reliability, and extend equipment life.

Supervisor, Lakeside Foods

2016 - 2018

Supervised all maintenance and production employees, ensuring efficient workflow and adherence to operational standards. Demonstrated full knowledge of production and processing systems, including operation, preventive maintenance, repairs, sanitation, startup, and quality requirements. Developed work schedules, estimated time and materials for jobs, and ensured cost-conscious planning and execution. Formulated and maintained accurate inventory of all critical parts and supplies to support uninterrupted operations. Took control of assigned areas to ensure completion of all tasks related to pre-pack and daily packing operations. Managed and safeguarded all company-owned tools and equipment. Promoted safety policies and procedures, identified potential hazards, and implemented corrective actions to maintain a safe work environment.

Packing Operator, Amgen LTD

2015 - 2016

Performed set up and ensured proper sanitation of the work area. Ordered, received, and organized all materials required for efficient area operation. Performed weight tests and recharge procedures to maintain product accuracy and compliance. Conducted value tests to verify product quality and ensure adherence to specifications.

Machine Maintenance Mechanic, US Cotton LLC

2011 - 2014

Repaired mechanical issues across all production equipment to ensure safe, reliable, and continuous operation. Led preventive maintenance (PM), corrective maintenance (CM), troubleshooting, and parts installation to minimize downtime. Worked directly with engineering teams on new product validation projects, providing technical input and hands-on support. Ensured a clean, safe work environment by identifying hazards and enforcing safety standards. Coordinated procurement of prototype tooling, support materials, and specialized equipment for development projects. Responsible for training personnel on new equipment, ensuring proper operation, safety, and maintenance procedures.

Mechanical/Compression Operator, Bristol Myers Squibb

2009 - 2011

Calibrated machines at the beginning of every shift to maintain accuracy, consistency, and production quality. Monitored machines throughout production, performing periodic checks to ensure maximum output and quality standards. Performed testing procedures to verify machine functionality and ensure optimal operation during production runs. Conducted PM activities and maintained equipment such as pumps, engines, motors, cranes, pneumatic tools, and conveyor systems. Diagnosed and repaired mechanical issues using blueprints, power tools, and precision instruments; installed replacement parts to restore equipment performance. Identified root causes of equipment failures and implemented corrective actions to minimize downtime and maintain production flow.

Compression Operator, McNeil

2007 - 2009

Operated tablet compression processes to produce tablets meeting all specifications outlined in the Master Document, following cGMP and SOP requirements. Located, transported, and staged blended materials in the Tablet Room; verified batch numbers and product labels for accuracy. Performed in-process checks for tablet weight, hardness, thickness, and friability; recorded results in the Compression Monitoring Record. Ensured machines operated at optimal performance by conducting routine checks and monitoring output quality throughout production. Sealed and properly identified each full box of tablets; placed boxes on pallets with correct labeling and documentation. Performed safety checks and maintained a clean, compliant work environment in accordance with company and regulatory standards.

SKILLS

Work with 6S
Project Management

Instrumentation
Problem-solving Skills

Good Mechanical Skills
Team Leadership

EDUCATION

Industrial General Mechanic, Mech Tech

Industrial Welding

CMT Technical School

Personal Trainer

Huertas College

Mechanic Industrail

ADDITIONAL INFORMATION

- **Languages:** English, Spanish.
- **Certifications:** Occupational Safety and Health Administration (OSHA), Kaizen Certification, Hazardous waste management and emergency response (HAZWOPER)
