

Luis Antonio García Sánchez

Apt. 204 Terrazas de Montecasino Toa Alta, PR 00953

Cel: (787) 409-4403; E-mail: lgarciapr31@gmail.com

EDUCATION

University of Puerto Rico, Mayaguez Campus
259, Avenida Alfonso Valdés Cobián, Mayaguez, 00681

August 2014 - May 2016

BS, Mayor: **Mechanical Engineering**

GPA: 3.52/4.00 Magna Cum Laude

RELEVANT COURSES AND CERTIFICATIONS:

- Certification on Project Management Life Cycle
- Six Sigma Green Belt
- Refrigeration and A/C (**Project**)

WORK EXPERIENCE

Engineering Manager

March 2024 – Present

Maintenance Manager, Boehringer Ingelheim, Barceloneta PR

- Lead and managed a maintenance team to ensure optimal equipment performance through corrective and preventive maintenance strategies.
- Implemented troubleshooting solutions for mechanical and electrical equipment, enhancing reliability in pharmaceutical production processes.
- Coordinated maintenance schedules using CMMS to ensure compliance with preventive maintenance programs and minimize downtime.
- Provided technical training to production and maintenance personnel on electro-mechanical equipment operations and care.
- Supported engineering projects, including equipment upgrades, design improvements, and performance optimization in a regulated environment.

Manufacturing Engineer

February 2022 – March 2024

Project Manufacturing Engineer, Abbott, Barceloneta PR

- Updated and maintained manufacturing process to current practices while developing continuous improvement projects and providing financial analysis.
- Provided process expertise to develop and support process control systems to enable continual drive for process and product quality improvements in Manufacturing. Designed manufacturing aids to improve process and ergonomics.
- Lead the introduction, maintenance and improvements of new equipment to manufacturing floor by preparing layout, work station ergonomics and equipment validation. Develop procedures to ensure that quality of the product is maintained throughout the monitoring phase of the implementation of new equipment and processes.

Process Engineer

January 2021 – February 2022

Manufacturing Process and Loss Elimination Lead, Clorox, Caguas PR

- Support Manufacturing activities by analyzing OEE and production data to ensure optimal running conditions and achieve established goals.
- Lead the Loss Elimination team to reduce the cost of operation and find new ways of optimizing processes. Work in conjunction with Maintenance and Operation teams to find root cause of equipment breakdown.
- CIP Project Lead for Cleaning and Sanitization of Water System: Design the cleaning in place for six water tanks, pipes, and pumps. Executed the cleaning and sanitization with the minimal disposition of solution waste. Achieved the expectation of reducing the Microbiological count in the water to less than 100 CFU/mL
- Bottle Reject Station Project Lead: The loss in OEE due to bent bottles was 3.5%. Design in conjunction with Cognex a bottle reject station to prevent the bent bottles to enter the labeling machine. The integration of the system will not affect the manufacturing line layout and can measure the yield of the bottle supplier in order to complete quality notifications.

Associate Manufacturing Engineer

February 2019 – January 2021

Guide Wire Manufacturing Engineer Line Support, Abbott, Barceloneta PR

- Support Manufacturing activities by analyzing yield and production data to ensure optimal running conditions and achieve established goals.
- Update and maintained manufacturing process to current practices while developing continuous improvement projects and providing financial analysis.
- Worked with CAPA Life Cycle: Initiator, Investigator, Resolution and Approver in order to address existing and/or potential quality issues for product and processes in a timely and organized manner.
- Provided process expertise to develop and support process control systems to enable continual drive for process and product quality improvements in Manufacturing. Designed manufacturing aids to improve process and ergonomics.

Manufacturing Engineer II Contingent**March 2018 – February 2019***Neuromodulation Remediation on the Medical Devices Industry, Medtronic, Juncos PR*

- Created documentation of manufacturing equipment including Installation Qualifications, Process Characterization, and Test Methods Validation.
- Executed PV and CSV qualification documentation by performing utilities verifications, functional tests, confirmations runs, and process limits challenge conditions.
- As part of the remediation activities, identified changes to manufacturing process procedures and mitigated these findings by implementing new instructions and inspections.

Validation Engineer**April 2017 – March 2018***Validation in CSV on the Pharmaceutical Industry and Special Projects, PACIV, San Juan PR*

- Validation of Computer System on different manufacturing development lines, in order to comply with 21 CFR Part 11.
- Conducted a strict and complete check-list to the computer system and identified mitigations. Create, revise, and develop validation documentation (RD, DS, IOQ, Validation Plan, SOP) to comply with all regulations such as FDA, MHRA, WHO and PIC/S.
- Indianapolis Special Project: Automation and Electrical Design support to Projects on Water Treatment Plants.
- Ireland Special Project: Support to Instrumentation Service Provider (ISP) for the Pharmaceutical Industry.

Automation Engineer**December 2016 – April 2017***Automation and Process Control on PLC, Panel View, and VFD Units, RC Automation, Vega Alta PR*

- PLC installation, programming (Ladder logic), and troubleshooting. VFD configuration and troubleshooting.
- Panel View design, programming, and installation.
- In-Plant testing and process control on food and manufacturing industries.

External Component Design and Structure Simulation Analyst**September 2016 – December 2016***Aerospace External Component Design and Structure Analysis, Infotech Aerospace Service, Isabela PR*

- Computer CAD design using NX of aerospace application components.
- Ansys preparation, simulation, and verification of component structure and behavior.
- GD&T, Tolerance Stack-up and Fit Check analysis to ensure quality and safety.

Fluid Mechanics Laboratory Experiment Development**Summer 2015***Preparation of viscometer sphere in free fall and statistical analysis experiment, UPRM, Mayaguez PR*

- Leader in design and conceptualization of fluid mechanics experiment for laboratory class.
- Develop a material cost analysis and selection for experimental procedure to achieve desired budget.
- Collaborated with technical staff to prepare and validate experimental procedure and data statistical analysis in order to achieve the experiment learning goals.

RESEARCH AND PROJECTS**Capstone Project****January 2016 – May 2016***HVAC cost reduction proposal, Abbott Pharma-Industry, Barceloneta PR*

- Task consisted in reducing the amount of energy consumed by the AHU of the Abbott Pharmaceutical plant.
- Collaborated with the electrical staff to present the calculations of the actual energy consumption of the AHU.
- Recommendations involve the implementation of automated scheduled operation and variable frequency drives.
- Project implementation will provide savings ranging from 30-41% of current costs.

Undergraduate Research**January 2015 – December 2015***Remote Thermo-Healable Polymer-Based Composites for Aerospace Applications, UPRM, Mayaguez PR*

- Designed and fabricated PMMA specimens in accordance to ASTM standards to provide comparable results.
- Performed Tensile and Healing tests on specimens to analyze and compare results to determine fracture toughness engineering properties.
- Concluded that PMMA material was within the desirable fracture toughness parameters to proceed in the next phase that consists of adding thermo-healing nanoparticles.

TECHNICAL AND NON-TECHNICAL SKILLS

- Bilingual; Excellent oral and writing skills in English and Spanish
- Certified Six Sigma Green Belt
- NX, JMP, SolidWorks, Ansys, Pro Engineering, AutoCAD (Basic), Matlab, C++ , Microsoft Word, Excel, PowerPoint
