

IBRAHIM A. RIVAS ANDINO

HC 3 Box 11971, Yabucoa, PR 00767 | (787) 943-0715 | ibrahimrivas711@gmail.com | Puerto Rico

PROFESSIONAL SUMMARY

Results-driven Quality Assurance and Quality Control Specialist with extensive experience in cGMP-regulated environments across pharmaceutical, medical device, and consumer product manufacturing industries. Proven expertise as Quality Approval Authority for validation lifecycle documentation (DS, URS, VP, IQ, OQ) covering critical utilities (purified water loops), ISO 8 cleanrooms, blending suites, and production lines. Strong background in non-conformance investigations (OOS/CAPA), incoming quality control, equipment/facility qualification, batch record review, and regulatory compliance (FDA, ISO 22716, ISO 17516, USP).

CORE COMPETENCIES & TECHNICAL SKILLS

Quality & Compliance:	Quality Sign-off / Approval Authority, cGMP/GDP, FDA Regulations, ISO 22716, ISO 17516, USP <1231>, USP <645>, OOS Investigations, CAPA, Root Cause Analysis, Risk Assessment.
Validation & Commissioning:	Final Approval & Quality Oversight for Design Specifications (DS), User Requirement Specifications (URS), Validation Plans (VP), IQ/OQ Protocols, ISO 8 Cleanrooms, and Utility Qualification.
Systems & Software:	Maximo, LIMS, TrackWise, SAP, WERUM, EBR (Electronic Batch Record), RT Reports, Symphony, PCS, Smartsheet, MS Office Suite.
Laboratory & Operations:	Incoming Quality Control (IQC), Raw Material & Component Inspection, Aseptic Techniques, Water Loop Sanitization & Monitoring, Equipment Qualification (Autoclaves, BSC, pH Meters), CIP/SIP/COP Operations.

PROFESSIONAL EXPERIENCE

Quality Assurance & System Validation Specialist (QA Approval Authority) Onovexa LLC	March 2026 – Present
- Serve as the final Quality Assurance Approver for all validation lifecycle documentation, including Design Specifications (DS), User Requirement Specifications (URS), Validation Plans (VP), and Installation/Operational Qualifications (IQ/OQ). - Direct external and internal authors on validation protocol creation, providing technical feedback, establishing quality expectations, and ensuring full compliance prior to final sign-off. - Authorize validation packages for critical facility expansion, including Purified Water Loops, ISO 8 Cleanrooms, Mixing/ Blending suites, and wet wipes production lines under ISO 22716, ISO 17516, and USP standards. - Lead Out-of-Specification (OOS) investigations and Quality Event (QE) evaluations, utilizing root-cause analysis tools to define and implement effective CAPAs. - Oversee chemical sanitization processes (peracetic acid, hydrogen peroxide) and routine monitoring of critical parameters, including conductivity (USP <645>) and total microbial counts. - Approve Standard Operating Procedures (SOPs), sampling plans, and risk assessments to align site operations with regulatory expectations.	
Quality Control & Quality Assurance Auditor Olein Corp	January 2025 – March 2026
- Developed, updated, and standardized Quality Assurance SOPs and operational guidelines, establishing fundamental quality structures across production lines. - Executed quality audits and technical inspections in manufacturing areas to ensure strict adherence to product specifications and regulatory standards. - Conducted audits of laboratory operations and analytical testing workflows to verify compliance with quality standards.	

- Managed incoming quality control and receiving inspections for raw materials and components, ensuring vendor compliance and material acceptability before release.

Associate Quality Control

2022 – 2025

Amgen, Inc.

- Executed incoming quality control sampling and inspection processes for primary/secondary packaging components, medical devices, and raw materials.
- Managed raw material sample shipments, analytical testing coordination, and batch record reviews in compliance with established SOPs and cGMP guidelines.
- Utilized enterprise software systems (Maximo, LIMS, TrackWise, SAP, EBR) to document inspection results, manage material releases, track equipment calibration/maintenance, and monitor quality metrics.
- Partnered with cross-functional teams to address material non-conformances and streamline incoming receiving workflows.

Manufacturing Associate

2018 – 2021

Amgen, Inc.

- Executed sanitization, washing, and preparation of bulk drug substance manufacturing equipment and cleanroom areas in strict adherence to SOPs, cGMP, and GDP.
- Operated Clean-in-Place (CIP), Steam-in-Place (SIP), Clean-out-of-Place (COP), and automated labware washers.
- Performed equipment assembly/disassembly, aseptic connections, and process monitoring during manufacturing cycles.
- Participated in triage, process troubleshooting, and procedure revision efforts to enhance operational safety and product quality.

Manufacturing Operator

2017

Medtronic, PR

- Inspected, labeled, and packaged final medical device products following SOPs and Good Manufacturing Practices.

EDUCATION

Bachelor of Science in Biology (B.S.) | University of Puerto Rico – Humacao, PR

2012 – 2017
